Work experience **Keepworks Technologies** **September 2016 – Present**
Software Developer

- Developed an API server from scratch
Stack: Hapi.js, Bookshelf, Postgresql
- Worked on porting an existing microservice to serverless architecture using lambda functions
Stack: AWS Lambda
- Developed a React-redux based website
Stack: React, Redux, Semantic UI

Ibibo Web Pvt. Ltd **June 2014 – August 2014**
(Goibibo.com)
Intern
Deploying an mBaaS (Mobile-Backend-as-a-Service) for User generated content for hotels using Loopback (Strongloop Inc.).
Handling data and integrating to the REST API.
Technologies Used: NodeJs(Express), MongoDB, JavaScript, Loopback, JSON and AJAX

Projects **Ride Sharing Application:**
Platform to find users willing to share journeys. It connects passengers with travellers who are going in the same way as the traveller based on Google Maps Routing API.
Stack: MeteorJs, Google Maps API, MongoDB and Semantic UI.
Scraper for flights data: Nodejs based scraper which scraps flight aggregator website for flight data and stores in the database after processing.
Stack: NodeJs, MongoDB, x-ray (library)

Contact Manager Web App:

Web Application where you log in and add, view, edit and delete your contacts.

Isomorphic, syncs in real time.

Stack: MeteorJs, MongoDB, Semantic-UI (User Interface)

ADVAITA 2015:

Developed College Fest Website

Primary Role: Developed the front-end of the Website.

UI was based on Web Components (Polymer, etc)

Stack: Web Components (Polymer), jQuery, Bootstrap, NodeJs, MongoDB

Terminal emailer:

A command line based email sender using Node.js

Stack: Node.js, nodemailer, prompt (npm packages)

Freelance**Infrastructure and Mobile app for a soon-to-be-launched startup:**

Developing server for the application and a react-native based Android application.

Stack: NodeJs, MongoDB, Loopback (API framework), React Native

Web app using MeteorJs and Polymer: Built a MeteorJs based web application on top of material design themed Bootstrap. Features include robust login system, mobile first UI, public and private routes.

Stack: MeteorJs and Polymer

Work duration: 2 months

Skills

- HTML, CSS, Javascript (ES2015+), jQuery and other Javascript libraries
- React, Redux, React Native
- NodeJs, ExpressJs, MeteorJs, MongoDB
- Web Components (Polymer)
- Git, Unix (Bash)
- UI frameworks like Bootstrap, Semantic-UI
- Amazon AWS (EC2, Lambda)

Interests

- Surfing Quora
- Playing Basketball
- Discovering New Technologies
- Hands-on Gadgets
- Reading Tech Blogs
